

Exercise 3 : Image retouch

Goal of the exercise is to master raster image operations.

Each student should divide index number modulo 20 and receives an image number he should deal with. From each picture:

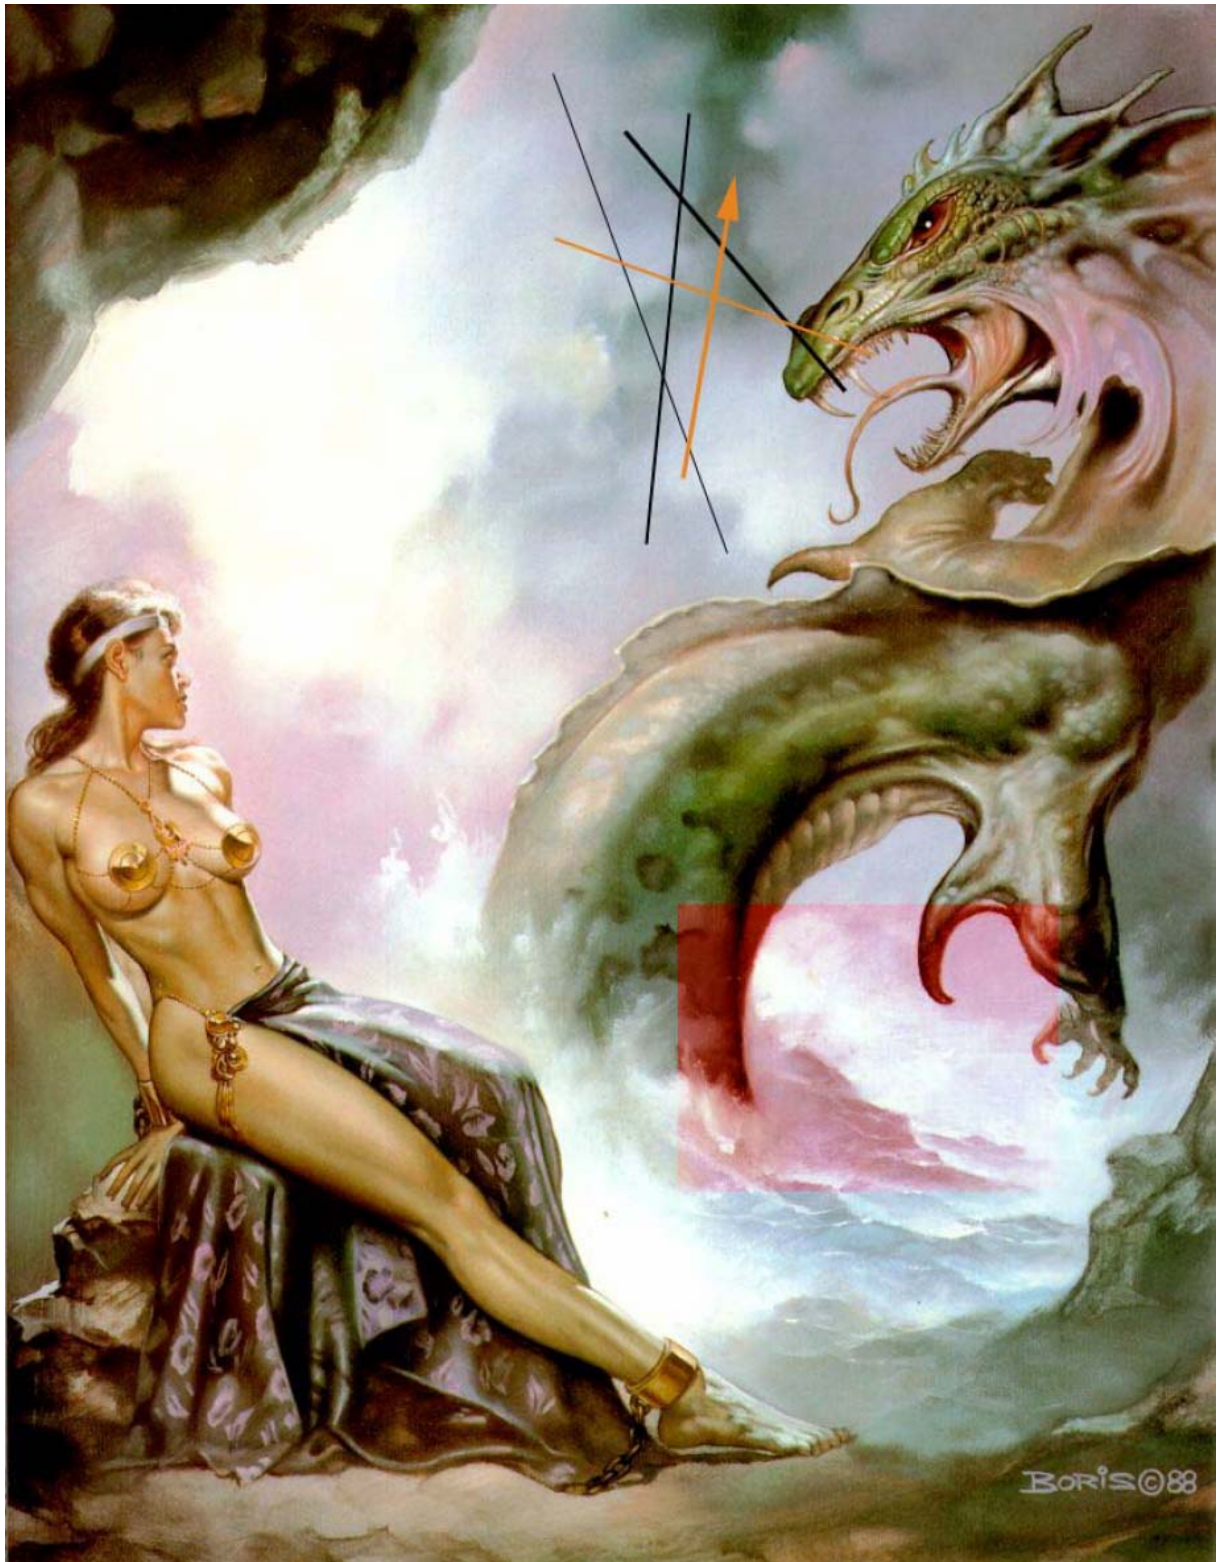

- black and orange arrows and lines should be removed,
- rectangular discoloration should be removed,
- instructions below the image should be fulfilled.

Each modification should be performed on a separate layer, it means that in final project 4 layers should be present:

- picture fragment without lines and arrows
- picture fragment without discoloration
- picture fragment with removed object according to the instruction below picture
- background layer: original (downloaded from this document) picture
